January 2022

## Wisdom and Wealth

*"Knowledge speaks, but wisdom listens"* - Jimi Hendrix

So the year ended on a rather tense note with most of us wondering when the next lockdown would be implemented amidst COVID-19. In 1999 a similar situation occurred globally which resulted in humanity going into a frenzy about the new millennium. Well, here we are in 2022 and Earth is still faithfully orbiting the sun.

The common universal factor amongst humans is that we all eventually age. With age, some people become wiser, some wealthier and some both. To acquire wisdom one needs a certain level of emotional intelligence and willingness to learn while wealth requires having a vision, ability to plan and commitment. Wisdom and wealth do not always coexist; there are poor wise people and foolish wealthy people.

One cannot dictate which has more value, but my thoughts are: Wisdom, once acquired, cannot be reversed or destroyed, wealth can.

May you pursue your heart's desire as you navigate this year!

Be and Stay Blessed Always!
